PREFACE.

The collection contained in this catalog was commenced by the father of the present Mr. Ashhurst, about 1830, whilst traveling in Europe. The coins of each country he visited attracted his attention and aroused an interest in Numismatics, which accounts for a number of the strictly uncirculated pieces of about that period in his collection.

The foreign coins I have arranged in chronological and geographical order, as far as possible, and those of the States of Germany and Italy in alphabetical order.

There are many choice specimens in the United States series, and I would call attention to the 1795, 1804 eagles, 1794 dollar, 1804, 1824 dimes, etc., and the many examples in superlative condition in all series.

Amongst the few private issues of gold coins is a specimen of the highest rarity—a Moffat & Co. oblong, $16 slug—most interesting as illustrating the very beginning of the necessity coinage of California.

I guarantee all the coins genuine, and will faithfully execute orders for the usual commission of 10 per cent. Bidders unknown to me will be required to send satisfactory reference or a cash deposit. The auctioneers will execute orders free of commission, but assume no responsibility, and require payment in advance.

Priced catalogs after the sale may be had for 75 cents.

1307 (1849) California. Moffat & Co. Oblong bar, size 19x9x1 thick, on which in sunken punch-mark MOFFAT & C°. in relief on lined ground; below, punched on plain surface, 20¾ CARAT; below this $16.00 punched into lined ground in long punch-mark. This is one of the earliest of the necessity coins of California, and, as subsequently nearly all of them were probably recoined upon the establishment of the Mints in San Francisco, it is to-day excessively rare. The value, 16, corresponds to the value of the Spanish doubloon, which was the principal gold coin in use in California at that time, and also to the value of an ounce of gold dust. The planchet shows it was probably cast in a vertical mould, then clipped to weight at one end, whilst the other shows the trace of the inlet for the metal. Weight, 435 gr., or just scant of avoirdupois ounce.
